

MACCO FEEDS AUSTRALIA

WILLIAMS, WA

Our 707 pellet is a complete dietary requirement feed and supplementary feeding of hay is not required. It contains a mixture of grains, cereal straw, hay, vitamins, minerals and canola meal.

Crude Protein ~ 15% to 16%
Energy ~ 10.8 mg

With sufficient roughage, the pellets can be used as maintenance feed for sheep in a feedlot or trail feeding situation.

THESE PELLETS CONTAIN BOVATEC AND ARE NOT TO BE FED TO HORSES OR PIGS

Champion White Suffolk Ram 2009 Perth Royal Show

The 707 pellet is also widely used by stud breeders with cereal hay to grow out rams to demonstrate their genetic potential

THE PELLETS DO NOT CONTAIN ANTIBIOTICS, ANIMAL PRODUCTS, UREA OR VIRGINIAMYCIN

CUSTOM MIX MINERAL SUPPLEMENTS

MAC M MIX / MAC M CATTLE MIX Contains all essential macro and trace minerals to supplement sheep and cattle being fed grain during summer months. This loose mix can be placed in containers near water points or fed daily in a grain mix.

MAC M PLUS CANOLA

Contains all essential macro and trace elements PLUS Canola Meal. Ideally suited for stud animals or back grounding and finishing prime lambs as part of a grain based diet.

Professional backup is always available from nutritionist Dr John Milton
